FREE DESIGN SERVICE

Simply give us your space and hardware requirements and you'll receive a 3-D CAD drawing and bill of materials. Contact us online at www.mayline.com or call 800-822-8037.

Standard or custom, Mayline can design and configure a system to meet your exact requirements, quickly and cost effectively. Call us today for the name and number of the local sales representative in your area.

- >> Shelves and worksurfaces fully adjustable in 1" increments.
- >> Worksurfaces available in scratch-resistant melamine, laminate or ESD laminate.
- >> Optional keyboard supports available.
- >> Variety of overhead and under-desk storage.
- >> Extensive cable management helps avoid clutter from cable and wires.

**31172 72" Station**

COMPLETE FLEXIBILITY describes this MODULAR, MID-PRICED racking system. Maytrix features a simple "BUILDING BLOCK" DESIGN which allows users to easily specify, add and reconfigure components as needed. Start with HEAVY-DUTY STEEL FRAMES, available in three heights, and add shelves, worksurfaces and storage units as required. COMPONENTS "HOOK" ONTO FRAMES. No hardware is involved in repositioning shelves and worksurfaces.

FRAME: 11-gauge steel welded construction, slotted in 1" increments, bolt together to expand capacity, individual frame rated to 800 lb. load.

LEG SUPPORTS: 11-gauge steel welded construction.

WORK SURFACES: Industrial grade particle board with thermally fused melamine, high pressure laminate, or ESD laminate. All worksurfaces include mounting brackets.

SHELVES: 14-gauge steel construction, integral support brackets, standard horizontal configuration with 13° tilt, load rated to 300 lbs.

CPU FLOOR SHELVES: 16-gauge steel construction, glide or caster kit available, attached server shelves also available, load rated to 300 lbs.
