### **X-Ray Shelving Introduced**

Kwik-File Storage Systems, LLC of Fridley, MN a leading manufacture of filing and storage furniture, today announced the introduction of x-ray shelving. Kwik-File offers units 36”, 42” and 48” wide, 18” and 36” deep shelving that can support up to 1000 lbs. per shelf. X-ray storage is among the heaviest media filed and consists of not only x-rays, but also mammography and MRI films.

Beyond the standard medical applications, x-ray depth of 18” and 36” is also great for bulk/box storage. This type of shelving is an ideal solution for cumbersome parts, equipment, and supplies. X-ray shelving is also great for items that would be normally stored in a “warehouse” type environment like cleaning supplies, fluids, maintenance supplies, bulk cartons and cases, reams of paper, machine parts and equipment.

Kwik – File, LLC is a division of The Mayline Group, which also includes The Mayline Company, located in Sheboygan, WI and Tiffany Industries, LLC located in Conway, AR. The Mayline Group is one of the largest niche contract furniture manufacturers, serving products segments as diverse as adjustable computer workstations, mail center furniture, large format filing systems, high density filing systems, training/meeting room tables, and telecommunications and networking racking and enclosures.
