Mayline® Adds ML-Series to their Height-Adjustable Table Line!

SHEBOYGAN, WI—July 22, 2015—Mayline® understands the value of promoting a healthier and more efficient workforce, and that is why they entered the height-adjustable table market back in the early 1980s by introducing their first sit-to-stand table.

With continued investments in this important product line, Mayline has now added a fifth table line to their already robust height-adjustable family – the **ML-Series**. **ML-Series** is sleek, stylish and quiet – perfect for any environment. Offered in a 2-stage base with 2 legs; or in a 3-stage base with an option for either 2 or 3 legs, the expandable frame can accommodate a multitude of top sizes – empowering users to change their posture throughout the day.

“Our team is excited to announce our new **ML-Series** height-adjustable table line,” said Amy Kiefer, VP of Strategic Marketing. “**ML-Series** provides one of the most sensible sit-to-stand solutions on the market today, and is a great addition to our height-adjustable table family.”

Find out more about **ML-Series** height-adjustable tables [here](#).

About Mayline
