## New Thesis™ Seating From Mayline® Proves That Having Options Is Always a Smart Choice

**SHEBOYGAN, WI—October 15, 2015**—Today’s dynamic business environments demand options and Mayline’s newest seating line **Thesis™** delivers with maximum comfort, style, and above all, versatility. The multi-purpose training chair is designed with a host of options to meet the wide variety of needs in today’s business spaces—from conference and meeting rooms, to any learning environment.

In addition to a comfortable sit, **Thesis™** offers many options to meet users’ needs—from back and arm styles, custom upholstery, glides, and more. For starters, customers can select from a stationary gray poly backrest, or a flexible black poly back that provides gentle recline and contoured lumbar support for additional comfort. The seat cushion is available in a choice of over 150 Momentum® seat fabrics to customize and complement décor.

**Thesis™** chairs are also available with no arms, two flip arms, or right arm with writing surface. No matter the choice, the seat and arms flip up for compact nesting and also stack vertically for storage efficiency and maximum use of space when not in use. In addition, the writing surface automatically moves to the side and into storage position when users stand.

“We are excited to introduce **Thesis™** Seating,” said Paula Forseth Dick, Senior Product Manager. “With modern design, crisp clean lines, numerous options, and overall comfort, **Thesis™** will be a popular choice for many!”
