REF. #	QTY.	DESCRIPTION	PART No.	
1	1	LIGHT ASSEMBLY	CALL~~	~~Denotes Size

HARDWARE BAG (PART No. A7695) *for individual item, order that part number

REF. #	QTY	DESCRIPTION	PART No.	
E1	8	EXPANSION NUT	T60*	
E2	8	#10 X 3/4 SCREW	X11*	

INSTRUCTIONS FOR MOUNTING LIGHT BOX ON FOUR-POST TABLE BASE

1. With Light Box face down (still in carton or placed on clean, smooth surface) insert Plastic Expansion Nuts (E1) in holes "B" and "C". Nuts may be tapped lightly with a hammer to seat them.
2. Attach Upper Hinge members (hole "B") and Tilt Rod Assemblies (holes "C") with #10 x 3/4 Screws (E2). Upper Hinge Members should be tightened snugly, but those in the Tilt Rod Brackets should be loose enough to allow adjustment in the slots.

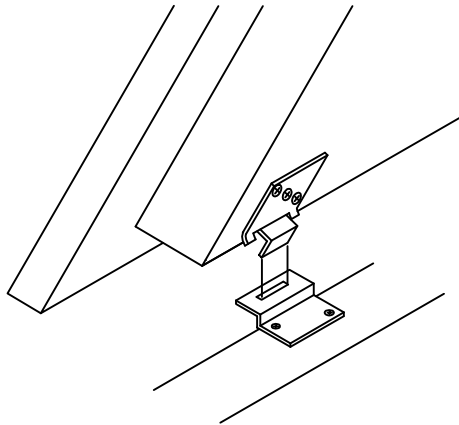

* ITEMS INCLUDED WITH THE BASE ASSEMBLY

On Line: www.mayline.com

3. Mount self-adhesive rubber bumpers* in locations shown at both rear corners of pan.

4. Mount Light Top to table base by inserting upper hinge members into mating hinge members on table rail with the Light Top in a near vertical position.

5. Slide a cushion spring on each tilt rod and insert the rods into the tilt rod guides on the side rails of the table.

6. Raise and lower the Light Top through its range of travel so that the tilt rods brackets locate themselves. Then tighten the tilt rod bracket screws. Do not over tighten.

INSTRUCTIONS FOR MOUNTING LIGHT BOX ON POWER TABLE BASE

1. With Light Box face down (still in carton or placed on clean, smooth surface) insert Plastic Expansion Nuts (E1) in holes "A". Nuts may be tapped lightly with a hammer to seat them.
2. Place top mounting brackets on the power base in near horizontal position.

3. Center Light Top over board brackets with pencil trough to front of base. Align holes in the light top with the slots in the brackets.
4. Attach the light box with #10 x 3/4 Screws (E2).

NOTE: Screws should only be drawn up snug. DO NOT over tighten.

FOLLOW INSTRUCTIONS WITH BASE FOR CONTROL INSTALLATION

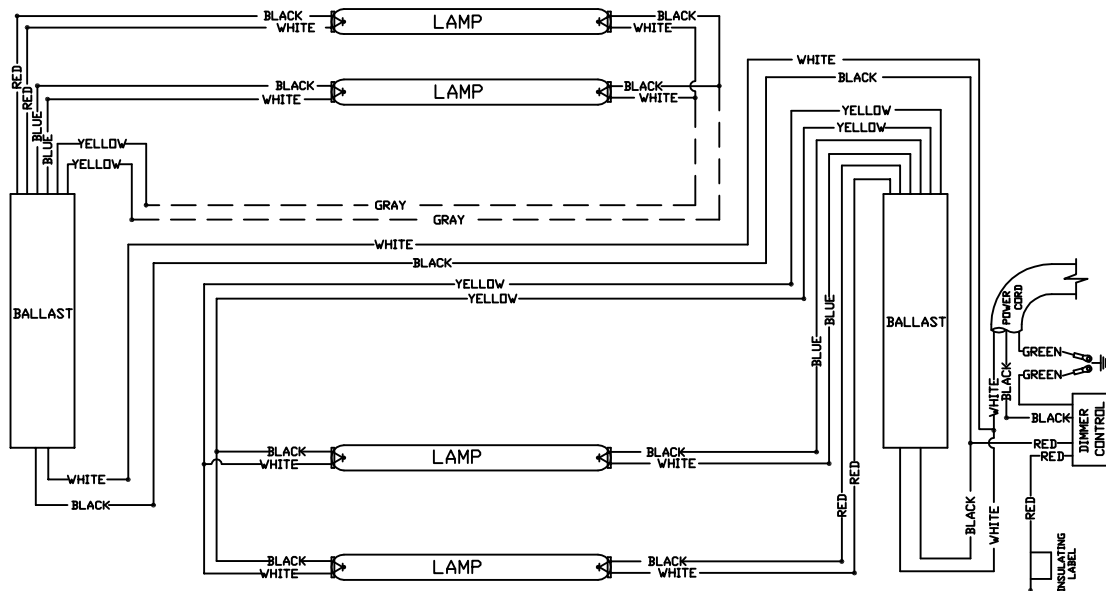

ADJUSTMENTS AND SERVICE FOR LIGHT TOP

- WARNING - Always disconnect power before opening to avoid shock hazard. For proper operation, unit must be plugged into a 3 wire grounded outlet.
- Lights are operated by depressing push-button once to turn light on or once to turn off. Sliding the dimmer control lever controls the brightness level.
- To replace lamps:
 - Remove three 1/4-28 Round head matching screws close to front.
 - Lift wood top frame by edge and support with prop rod found in right hand side of lamp compartment. Lift rear end of rod out of clip and insert rod end into round hole in underside of top frame.

USE ONLY cool white rapid start lamps, either F25T8 (36" long) or F32T8 (48" long).

DO NOT USE "Wattmizer" or other wattage lamps.

- For best operation, replace all bulbs at same time.

- Information on the electrical system shown for reference only for service by qualified electrician.
