1. Attach the plate to the inside corner using the #12 wood screws (C).
2. Position the other bracket a minimum of 6 1/2 inches in from the outside edge and screw in place using the supplied washers and particle board screws and washers (A and B).
3. Position the bidge/return in the desired location (be sure to pull tight).
4. Attach to top using the supplied washers and particle board screws (A and B).

Note: For return, only one side is required. For bridge, repeat all steps for the other side. Do steps 1 and 2 for both sides, then 3 and 4 for both sides.
