1. Fasten the brackets to the underside of the cabinet as shown below. Use the supplied screws. Note: Center the brackets on the cabinet shell bottom only. **Do not include the doors in the measurement.**
2. Remove the side cladding. Slide the cladding up and out as shown to remove. Remove the top cladding using the same technique as the side.

3. Center the cabinet on the Beltway.

4. Engage both cabinet brackets into the Beltway slots.

5. Slide the cabinet to the desired location.

6. Repeat for remaining cabinets.

7. Replace cladding by reversing step 2.
