TECHNOLOGY BELTWAY EZTB**

1. Push the ends of the table together. Leave a gap between the tops to accept the Beltway.

2. Set the Beltway between the two tables and slide the tables firmly against the Beltway.

Note:
Make sure the table is pushed firmly against the Beltway, and the lip is resting on the top of the worksurface.
3. Place the 3/8" bolts (2) in through the holes in the bottom of the Beltway.

4. Attach the bracket with the supplied nut.

5. Tighten the nut.

6. Screw the bracket to each top with the supplied screws.

Note: Use this bracket when the beltway is across the ends of the tables.

Note: Use this bracket when the beltway is running the width of the tables as shown at left.
7. Remove the side cladding by sliding up, then pulling out.

8. Remove the top cladding by sliding in the direction of the arrow and lifting.

9. Remove the power block holder by pushing up on it.

10. Separate the 2 pieces and insert the power block (ordered separately).

11. Attach the appropriate wire harness into the block and slide back in place.

**NOTE:**
ELECTRICAL COMPONENTS SOLD SEPARATELY.

12. Reinstall the cladding by reversing steps 7 and 8.

Note: Test wiring before replacing the cladding.
