1. Attach the leg to the outside corner opposite where the ped will be located. Be sure to face the gusset to the inside.
2. Assemble the ped to the top per the instructions supplied with the ped.
3. Install the brackets in the uppermost slot as shown. Flanges should face each other.
4. Slide assembly in until it touches the wall. Be sure top is under wall lip.

5. Fasten the top to the end bracket using the supplied wood screws (A).

6. Fasten the mid bracket (between the end and ped) using the particle board screw and washer (B and C).
