Attach Credenza Leg (CLL/CLR) and Credenza Pedestal (CPBF/CFF/CPUL/CPUR)

Secure Modesty Panel to Credenza Leg (CLL/CLR) or pedestal (CPBF/CFF/CPUL/CPUR)
Proper Care of Wood Surfaces

- Clean all surfaces frequently with a soft cloth dampened with warm water, moving the cloth with the grain.
- Avoid exposure of finishes to extremes of heat and cold, or to wide humidity variances.
- Lift objects to move them, never pull them across the finished surface.
- Avoid excessive humidity, especially near heating and cooling vents, on the west or east sides of your workstations.
- Wipe up spills immediately with a soft cloth dampened with warm water.
- Avoid exposure of furniture to harsh solvents (nail polish remover, acetone, etc.), as it will cause finish deterioration.
- Avoid exposure of finishes to strong sunlight. The wood underneath the finish may change color from prolonged exposure to sunlight.
- Avoid exposure of finishes to strong detergents. The wood underneath the finish may fade or blister.
- If using a protective glass top, place rubber pads under the glass top to allow for expansion and contraction between the glass and the tabletop.
- Do not use plastic, vinyl or rubber items on finished wood surfaces.
- If using a protective desk pad, use a protective wood pad.
- If multiple desk pads are used, set the pads with the grain running across the finished surface. When they are pulled apart, move with the grain.
- Avoid contact with any objects that could mar a finish, especially pens and sharp objects.
- Avoid excessive humidity, especially near heating and cooling vents, on the west or east sides of your workstations.
- Wipe up spills immediately with a soft cloth dampened with warm water.
- Avoid exposure of furniture to strong sunlight. The wood underneath the finish may change color from prolonged exposure to sunlight.
- Avoid exposure of furniture to harsh solvents (nail polish remover, acetone, etc.), as it will cause finish deterioration.

Finish Color Matching
