Secure Modesty Panel to Desk Leg (DLL/DR) or Desk Pedestal (DPBF/DFF).

Supplied with: (DLL/DR) or (DPBF/DFF) or (H)

(DLL/DR) or (DPBF/DFF) or (H)
With proper care of the wood surfaces and finishes, your office furniture will...

- Avoid exposure of finishes to harsh solvents (e.g., paint remover, antistatic sprays).
- Avoid exposure of finishes to strong sunlight. Place your furniture where it will not be exposed to the sun.
- Avoid exposure of finishes to strong alkaline cleaning solutions. The furniture finishes are not designed to withstand such severe cleaning conditions.
- If using a protective glass top, place square pads under the glass to allow the wood to breathe.
- Lift objects to move them, never pull them across the finished surface.
- Do not leave plastic, vinyl or rubber objects on finished wood surfaces.
- Change causes by pens and sharp objects.
- Cushion paper on refrigerator to protect your finish from possible damage caused by pens and sharp objects.
- Lock in the grain between the pieces, if possible.
- Apply an additional adhesive to a protective coat pad. This single layer of adhesive will prevent the grain from splitting. [Diagram]
- If objects are moved across the finished surface, always move from left to right.
- Immediately remove any liquids that come in contact with wood surfaces. [Diagram]
- Do not use water based solvents. Morten the cloth with the grain. [Diagram]
- Clean all surfaces regularly with a soft cloth dampened with warm water, a mild detergent, and a small amount of 10% vinegar.

Proper Care of Wood Surfaces

When proper care of the wood surfaces and finishes, your office furniture will...

- Provide drainage and ventilation for years. Please reference these care-to-follow tips.
